

Mobile Infusion Technology System

Mobile Infusion Technology System (MITS)

The CERL MITS Table is an analysis tool meant to characterize problems associated with vacuum infusion process (VIP) manufacturing. It does this by providing an environment where variables during the infusion process can be both controlled and clearly observed.

Features and Benefits

- ▶ Transparent glass surface with grid measurement system
- ▶ Heated surface with range to 85C using standard 110V outlet
- ▶ 2 digital cameras for simultaneous top and bottom surface video recording
- ▶ Underside lighting
- ▶ Track system for camera and hose placement
- ▶ Resin reservoir shelf
- ▶ Standard operating procedure manual
- ▶ Manufactured by The Montalvo Corporation
